Message

Dear Valued Customers,

I am excited to announce the launch of Falcon brand dental instruments in Indonesia. As a leading manufacturer based in Pakistan since 1975, we take pride in our commitment to quality and innovation, establishing ourselves as a benchmark in the dental industry. Our products are trusted by professionals and distributed in over 50 countries worldwide.

Our pre-launch research has revealed a significant need among Indonesian dentists for high-quality instruments that are both reliable and fairly priced. Currently, the market is saturated with either overpriced Pakistani-made instruments re-exported under Italian or German brand names or low-quality non-branded alternatives.

At Falcon, we are dedicated to bridging this gap. Our products ensure you receive the quality you deserve without compromising your budget. We believe that every dentist should have access to superior quality instruments at a fair price.

Thank you for considering Falcon as your partner in dental care. We look forward to supporting your practice with our exceptional offerings.

Warm regards,

Adnan K. Hayat
Managing Director

Falcon instruments
are sold in more than
50 countries
worldwide having a
strong network of business
partners and distributors.

Over **2 million** dental
instruments in service
in **EU & USA**

The Company

Falcon Surgical, a leading manufacturer which for over thirty years has specialized in manufacturing instruments for surgery, dentistry, dental laboratories, cranio maxillo facial surgery, body care and veterinary.

Thanks to continuous innovation and the use of certified raw materials, Falcon Surgical has been able to develop such a comprehensive variety of instruments as to satisfy the varying and increasingly severe requirements of an international audience both in terms of quality and range.

Manufacturing Activities

All Falcon Instruments are made using state of the art materials and manufacturing techniques which extend to the use of sophisticated metals and alloys such as titanium and nickel titanium.

All manufacturing activities are performed under Quality Assurance conditions as laid forth by the EN ISO 9001 and 13485 norms (all of which has been certified and is being continuously monitored by recognised international bodies) and in compliance with all laws and directives ruling the distribution of Medical Devices.

Quality Guarantee

As a result of the experience accumulated in over three decades and the stringent quality control tests both in production and at the final stages of manufacturing Falcon Surgical is in a position to guarantee a consistent level of quality of any product in their range.

Customer Care

Our customer care department will be glad to help via a vis a vis request for assistance.

Your satisfaction
is our
#1 priority

Self Aspirating Syringes

Self Aspiration: How it works

During use, the thumb pressure on the plunger or thumb disc stretches the diaphragm over a small metal projection inside of the syringe nozzle, increasing pressure inside of the cartridge. As the thumb pressure is released, pressure inside the cartridge lessens and aspiration occurs automatically. (Instruction for use are supplied with the product)

Self Aspirating Syringes

Dual self aspiration system:

Disc system syringe has dual aspiration feature to achieve self aspiration.

Aspiration before injection:

Insert syringe in tissue and press Thumb disc to achieve aspiration.

Aspiration during injection:

Automatic aspiration occurs whenever pressure on the plunger is released.

Atraumatic Extraction

Periotomes

Periotomes are dental instruments used to cut periodontal ligaments for atraumatic tooth extractions and dental implant placement. They have thin sharp blades to facilitate the removal of teeth with minimal damage to surrounding alveolar bone.

NiTi Flexible Periotomes

NiTi flexible periotomes cut the periodontal ligament (PDL) to aid in tooth extraction. NiTi is a flexible and unbreakable material.

Luxating Hybrids

A combination of a perioste and a luxating root elevator, to cut the periodontal ligaments in preparation for tooth extraction and minimize tooth extraction.

Atraumatic Extraction Forceps

Deep and Secure Grip

Fine and sharp beaks cut trough periodontium to achieve contact with root structure.

Reduce Fracture of Crown and Roots

Anatomically shaped to perfectly match the teeth and allow to reach deep and large contact areas to provide secure grip, thus avoiding fracture of the brittle crown.

Reduce Trauma of Soft Tissues

The fine beaks fit in areas where standard design cannot be applied and reduce trauma to the soft tissues as they are reflected rather than crushed.

Soft Brushes

The concept of the Soft Brushing is to disorganize the collagen fibers of the fibrous periosteum: the stiffness is reduced and the flap release increases just by using the brushes. The brush tools do not cut anything. The flap release is the result of the separation of the periosteum fibers.

Wire bending and cutting pliers

● Bends / Piega : 0.9 mm (.036")
Cuts / Taglia : 0.7 mm (.028")

DO.895.300
Waldsachs
Wire bending and cutting pliers

● Bends / Piega : 0.9 mm (.036")
Cuts / Taglia : 0.7 mm (.028")

Pliers for "Removable Appliance Technique"

Falcon
 Heavy duty hard wire cutters
 • Compound action
 • Cut heavy wires with little force

DO.785.300
 Small
 Stainless steel, autoclavable

● 0.87 mm to 1.1 mm (.028" to .045")

DO.786.300
 Large
 Stainless steel, autoclavable

● 0.80 mm to 1.50 mm (.032" to .057")

DO.787.300
 Small
 Stainless steel, autoclavable

● 0.87 mm to 1.1 mm (.028" to .045")

DO.888.300
 Universal
 Parallel jaw pliers with side cutter, compound action
 Powerful pliers easily cuts outer bow of a facebow, serrated jaws assure non-slip grip while bending

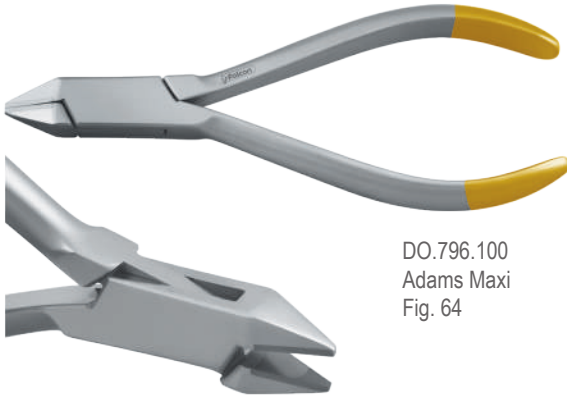

Max. 1.80 mm (.071")

Pliers for "Removable Appliance Technique"

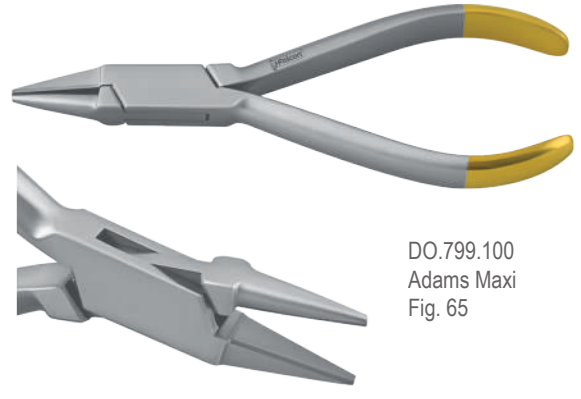

Adams wire bending pliers
Tips of all Adams pliers parallel at 1mm opening
box joint, available in mini and maxi sizes

Falcon[®]
GRIP With Tungsten Carbide Inserts

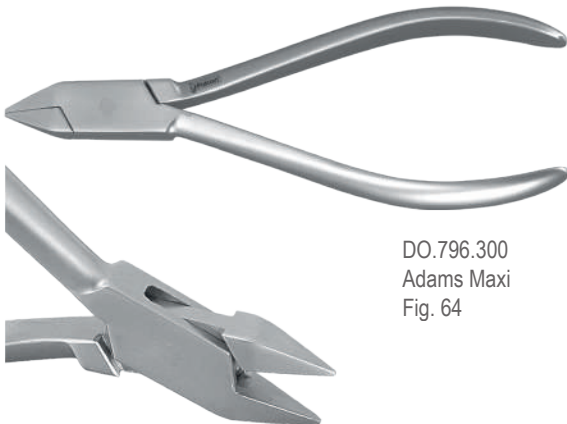

DO.796.100
Adams Maxi
Fig. 64

- 0.36 mm to 0.81 mm (.014" to .032")
- Max. 0.56 mm x 0.71 mm (.022" x .028")

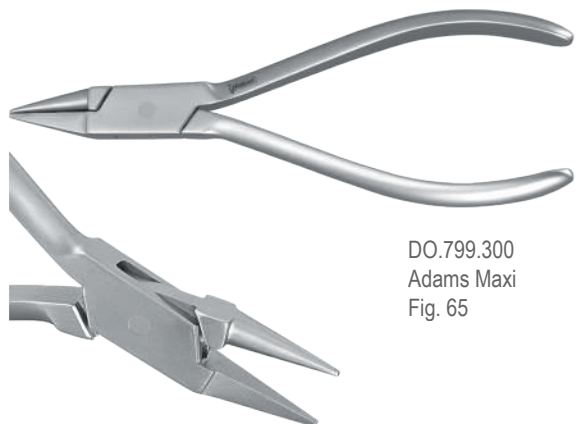

DO.799.100
Adams Maxi

DO.795.300
Adams Mini

- 0.36 mm to 0.81 mm (.014" to .032")
- Max. 0.56 mm x 0.71 mm (.022" x .028")

DO.798.300
Adams Mini

- 0.36 mm to 0.81 mm (.014" to .032")
- Max. 0.56 mm x 0.71 mm (.022" x .028")

Pliers for "Removable Appliance Technique"

Aderer 3-Jaw wire bending pliers
Precision aligned and contoured tips for consistent bends without damaging wire.

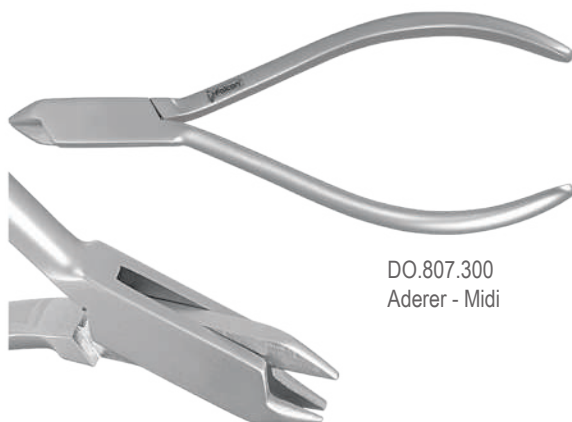

DO.806.300
Aderer - Mini

- 0.36 mm to 0.50 mm (.014" to .020")
- Max. 0.53 mm x 0.64 mm (.021" x .020")

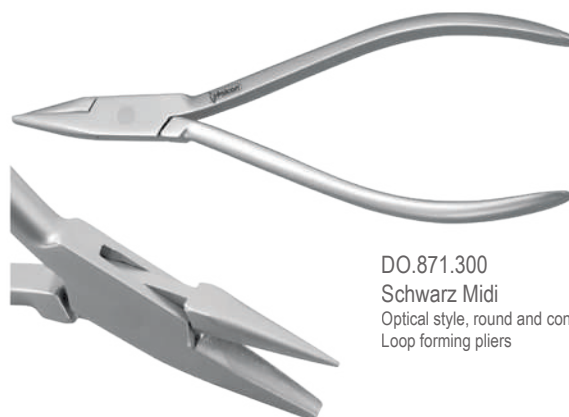

DO.870.300
Schwarz Mini
Optical style, round and concave beaks.
Loop forming pliers

- Max. 0.50 mm (.020")

DO.807.300
Aderer - Midi

- 0.36 mm to 0.71 mm (.014" to .025")
- Max. 0.56 mm x 0.71 mm (.022" x .028")

DO.871.300
Schwarz Midi
Optical style, round and concave beaks.
Loop forming pliers

- Max. 0.70 mm (.028")

DO.808.300
Aderer - Maxi

- 0.50 mm to 0.91 mm (.020" to .036")
- Max. 0.56 mm x 0.71 mm (.022" x .028")

DO.872.300
Schwarz Maxi
Optical style, round and concave beaks.
Loop forming pliers

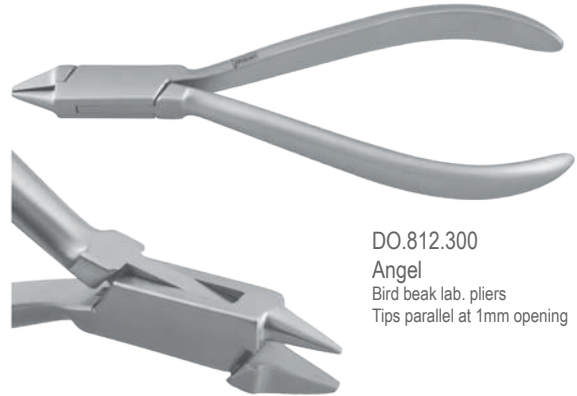

- Max. 0.70 mm (.028")

Pliers for "Removable Appliance Technique"

DO.874.300
Schwarz graduated
Optical style, round and concave beaks.
Loop forming pliers. Graduation prevents
wire slippage

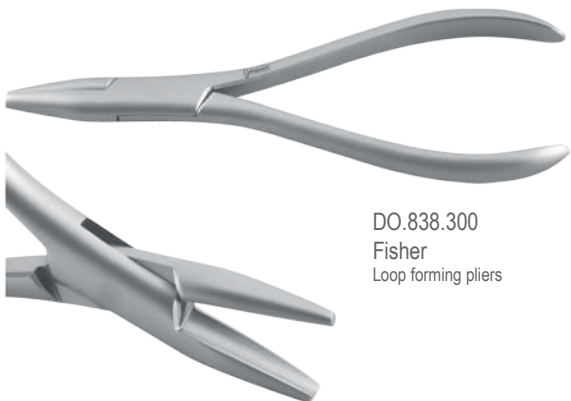

● Max. 0.70 mm (.028")

DO.812.300
Angel
Bird beak lab. pliers
Tips parallel at 1mm opening

● 0.36 mm to 0.71 mm (.014" to .028")

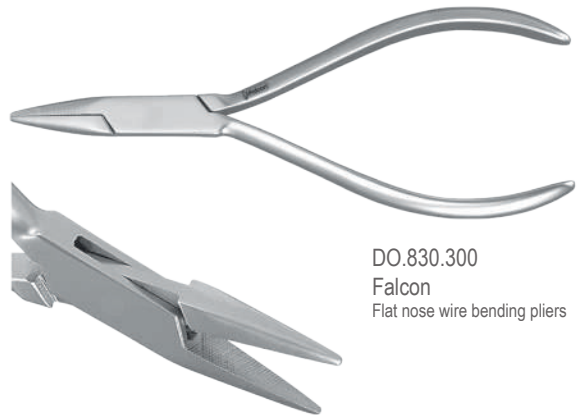

■ Max. 0.56 mm x 0.71 mm (.022" x .028")

DO.838.300
Fisher
Loop forming pliers

● 0.36 mm to 0.64 mm (.014" to .025")

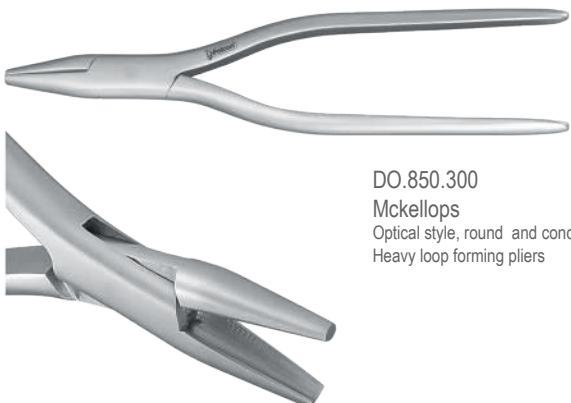

■ Max. 0.53 mm x 0.64 mm (.021" x .025")

DO.830.300
Falcon
Flat nose wire bending pliers

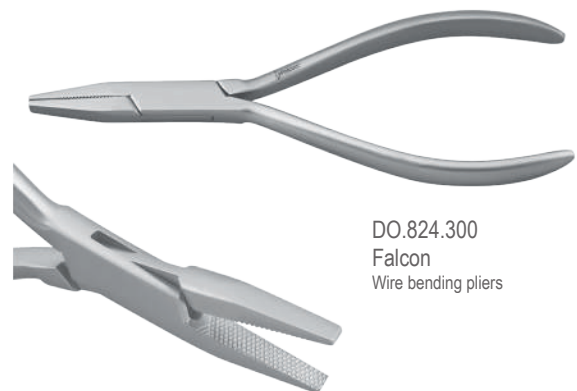

● 0.36 mm to 0.71 mm (.014" to .028")

■ Max. 0.56 mm x 0.71 mm (.022" x .028")

DO.850.300
Mckellops
Optical style, round and concave beaks.
Heavy loop forming pliers

● Max. 0.80 mm (.032")

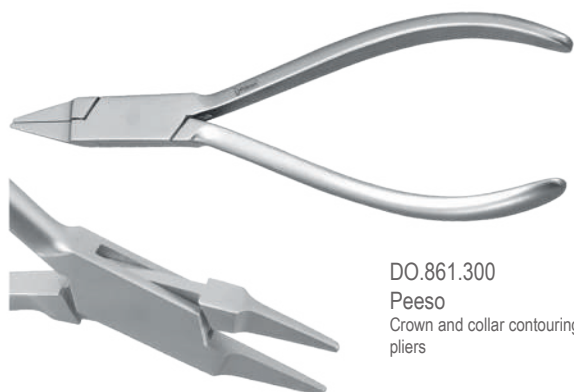

DO.824.300
Falcon
Wire bending pliers

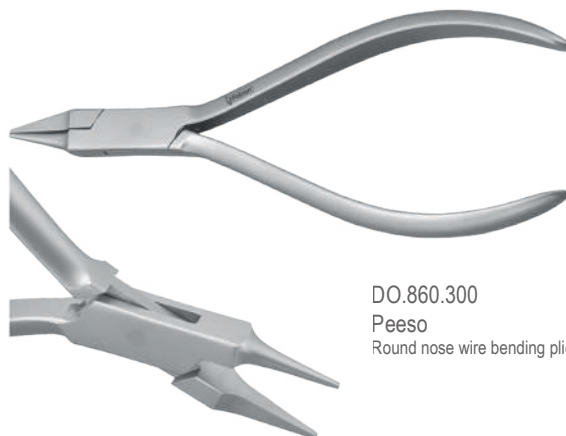

● 0.36 mm to 0.64 mm (.014" to .025")

■ Max. 0.53 mm x 0.64 mm (.021" x .025")

Pliers for "Removable Appliance Technique"

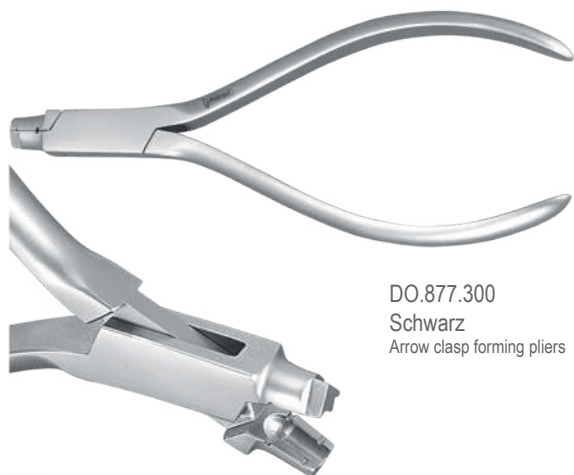

DO.861.300
Peeso
Crown and collar contouring
pliers

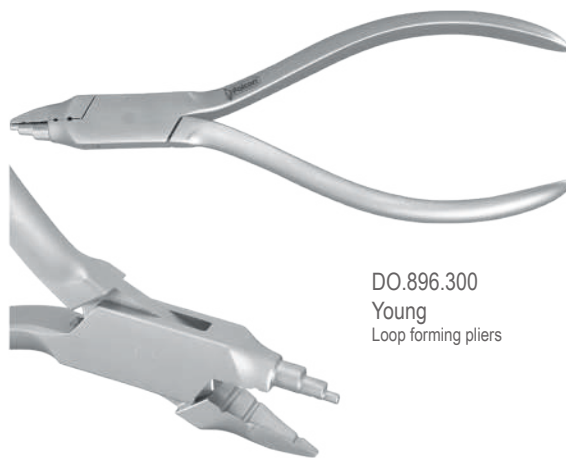

DO.860.300
